# **Introduction to Urban company**

Urban Company (formerly known as Urban Clap) is an Indian gig marketplace that offers home repairs and maintenance services, and home beauty and wellness services. In 2014, the company was founded by Abhiraj Singh Bhal, Varun Khaitan and Raghav Chandra. It was valued at USD 2.8 billion after its employee stock sale programme concluded in December 2021. As of 2021, the company operates in 30+ Indian cities and in the UAE, Singapore, Australia and Saudi Arabia.

## **Introduction to Discover Tool**

Discovery is the tool that automatically discovers devices in your network. You supply the discovery tool with a range or list of IP addresses, and the discovery tool determines if a device exists at each IP address. For each device the discovery tool "discovers", the discovery tool can collect a list of open ports, DNS information, SSL certificates, a list of network interfaces, device classes to align with the device, and basic SNMP information about the device. The discovery tool also determines which (if any) Dynamic Applications to align with the device. If the discovery tool finds Dynamic Applications to align with the device, the discovery tool triggers collection from the device, using each aligned Dynamic Application.
