Introduction to Discover tool ..... 2-5

POC ..... 7-15

# **Introduction to CS company**

Cs.money is a website where different gun skin of counterstrike game is sold in usd \$ .

## **Introduction to Discover Tool**

Discovery is the tool that automatically discovers devices in your network. You supply the discovery tool with a range or list of IP addresses, and the discovery tool determines if a device exists at each IP address. For each device the discovery tool "discovers", the discovery tool can collect a list of open ports, DNS information, SSL certificates, a list of network interfaces, device classes to align with the device, and basic SNMP information about the device. The discovery tool also determines which (if any) Dynamic Applications to align with the device. If the discovery tool finds Dynamic Applications to align with the device, the discovery tool triggers collection from the device, using each aligned Dynamic Application.

DISCOVER

By Lee Baird

Uses Amass, ARIN, DNSRecon, dnstwist, goog-mail, goohost, theHarvester,
Metasploit, Whois, multiple websites, and recon-ng.

[*] Acquire API keys for maximum results with theHarvester and recon-ng.
