Introduction to Gyapu company

GYAPU is the most rewarding online shopping platform led by Nepali Entrepreneurs with the objective of expanding and flourishing e-commerce industries in Nepal and across South East Asia. The primary objective of GYAPU is to build the Nepali Global Brand and promote domestic Nepali products in Nepal and throughout the globe.

Introduction to Discover Tool

Discovery is the tool that automatically discovers devices in your network. You supply the discovery tool with a range or list of IP addresses, and the discovery tool determines if a device exists at each IP address. For each device the discovery tool "discovers", the discovery tool can collect a list of open ports, DNS information, SSL certificates, a list of network interfaces, device classes to align with the device, and basic SNMP information about the device. The discovery tool also determines which (if any) Dynamic Applications to align with the device. If the discovery tool finds Dynamic Applications to align with the device, the discovery tool triggers collection from the device, using each aligned Dynamic Application.

```

 |__|__|  |_|  |_____||_____||_____| \___/ |_____||__|__|

By Lee Baird

Uses Amass, ARIN, DNSRecon, dnstwist, goog-mail, goohost, theHarvester,
Metasploit, Whois, multiple websites, and recon-ng.

[*] Acquire API keys for maximum results with theHarvester and recon-ng.

================================================================

Usage

Company: Target
Domain:  target.com

================================================================

Company: gyapu
Domain:  gyapu.com

================================================================

Amass                        (1/47)
panic: reflect: slice index out of range [recovered]
        panic: reflect: slice index out of range

goroutine 296 [running]:
encoding/json.(*encodeState).marshal.func1()
        /usr/lib/go-1.18/src/encoding/json/encode.go:328 +0x6e
panic({0xe99560, 0x1923f60})
        /usr/lib/go-1.18/src/runtime/panic.go:838 +0x207
```

In the above picture this is the Starting phase of discover tool, where I have set the domain to

gyapu.com

kali@kali: ~/Desktop/discover ✕

```
